What is the IFRF global network?

The IFRF global network includes 130+ organisations representing the power generation, petroleum refining, iron and steel, cement, glass, and chemical manufacturing industries as well as combustion equipment manufacturers, fuels and industrial gas producers and distributors, research institutes and universities. Through this network IFRF facilitates collaboration and cooperation between organisations from both industry and academia.

What are the National Flame Research Committees?

IFRF is co-ordinated by several 'National Flame Research Committees' plus an Associate Member Group which incorporates members that are without a National Committee. Each National Committee holds regular meetings and events in their country, bringing together industry representatives and academics to network and share key findings and programmes.

National Flame Research Committees

- American Flame (AFRC)
- British Flame (BFRC)
- Chinese Flame (CFRC)
- French Flame (CF)
- Italian Flame (CI)
- German Flame (DVV)
- Finnish Flame (FFRC)
- Netherlands Flame (NVV)
- Swedish Flame (SFRC)

and the Associate Member Group.

Connect with us!

You can join the IFRF conversation through our social media pages. Connect with us on [Twitter](#), [LinkedIn](#), [YouTube](#) and [WeChat](#).

Become an IFRF Member
